FRAMEWORK 5. PHILOSOPHY :

Concepts concerning to TES Philosophy .

What does it represent?

The Economist System (TES) is a Philosophy of Communication between the Economist and the Economy at all level : macro, micro, national, international, academic, research and consulting... by means of computer systems and now with Internet power on line in an Economy as a whole in the digital world.

To understand the TES Philosophy to involve the ten frameworks of this academic system of the Economy .

The Economist System (TES) virtual machine is an online software resource designed to help you solve economic models, using Gauss-Seidel, Winters or Regressions. The system was co-developed by Aedil Suarez, chair of ECAAR-Chile and director of MSc and PhD programs at UTEM (Universidad Tecnológica Metropolitana del Estado de Chile), along with Josef Kolar at Prague Technical University and Hector Medellin of ITZ (Instituto Tecnológico of Zacatepec) in México.

TES is an academic system only.

The first version is based on the Dietrich Fischer course of the New York University “ Computer Methods Applied to Economy “
Professor Dietrich Fisher is an ECAAR BOARD DIRECTORS , now EPS : ECONOMIST for PEACE and SECURITY . www.EPSUSA.ORG
(touch may 2008)

A new version of the TES virtual machine was launched recently, along with a handbook and other resources.

<http://www.theeconomistsystem.com>

Students web page of MSc & PhD Thesis Workshop supportable by TES is <http://thesis.workshop.googlepages.com> , that include

TES Culture : Knowledge is Wealth and TES on line is just in time to learn Economics making a Wealth .
